SYNC (NM_001161708) Human Tagged Lenti ORF Clone

Product data:

Product Type: Expression Plasmids

Product Name: SYNC (NM_001161708) Human Tagged Lenti ORF Clone

Tag: mGFP Symbol: SYNC

Synonyms: SYNC1; SYNCOILIN

Mammalian Cell Puromycin

Selection:

Vector: pLenti-C-mGFP-P2A-Puro (PS100093)

E. coli Selection: Chloramphenicol (34 ug/mL)

ORF Nucleotide The ORF insert of this clone is exactly the same as(RC228394).

Sgfl-Mlul

Sequence:

14.5...55.

Restriction Sites: Cloning Scheme:

^{*} The last codon before the Stop codon of the ORF

ACCN: NM_001161708

ORF Size: 1428 bp

SYNC (NM_001161708) Human Tagged Lenti ORF Clone - RC228394L4

OTI Disclaimer: The molecular sequence of this clone aligns with the gene accession number as a point of

reference only. However, individual transcript sequences of the same gene can differ through naturally occurring variations (e.g. polymorphisms), each with its own valid existence. This clone is substantially in agreement with the reference, but a complete review of all prevailing

variants is recommended prior to use. More info

OTI Annotation: This clone was engineered to express the complete ORF with an expression tag. Expression

varies depending on the nature of the gene.

Components: The ORF clone is ion-exchange column purified and shipped in a 2D barcoded Matrix tube

containing 10ug of transfection-ready, dried plasmid DNA (reconstitute with 100 ul of water).

Reconstitution Method: 1. Centrifuge at 5,000xg for 5min.

2. Carefully open the tube and add 100ul of sterile water to dissolve the DNA.

3. Close the tube and incubate for 10 minutes at room temperature.

4. Briefly vortex the tube and then do a quick spin (less than 5000xg) to concentrate the liquid

at the bottom.

5. Store the suspended plasmid at -20°C. The DNA is stable for at least one year from date of

shipping when stored at -20°C.

RefSeq: <u>NM 001161708.1</u>, <u>NP 001155180.1</u>

54.7 kDa

 RefSeq ORF:
 1431 bp

 Locus ID:
 81493

 UniProt ID:
 Q9H7C4

 Cytogenetics:
 1p35.1

MW:

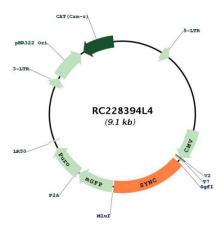

Gene Summary: This gene encodes a member of the intermediate filament family which contains an N-

terminal head domain, followed by a central coiled-coil region and a short C-terminal tail. The protein is highly expressed in skeletal and cardiac muscle. The protein links the dystrophin associated protein complex (DAPC) to desmin filaments in muscle and may have a structural role in striated muscle. Multiple transcript variants encoding different isoforms have been

found for this gene. [provided by RefSeq, Jun 2009]
