Acinus (ACIN1) (NM_001164815) Human Tagged ORF Clone Lentiviral Particle

Product data:

Product Type: Lentiviral Particles

Product Name: Acinus (ACIN1) (NM_001164815) Human Tagged ORF Clone Lentiviral Particle

Symbol: ACIN1

Synonyms: ACINUS; ACN; fSAP152

Mammalian Cell

Selection:

Puromycin

Vector: pLenti-C-Myc-DDK-P2A-Puro (PS100092)

Tag: Myc-DDK

ACCN: NM_001164815

ORF Size: 3903 bp

ORF Nucleotide

The ORF insert of this clone is exactly the same as(RC228670).

Sequence:

OTI Disclaimer: The molecular sequence of this clone aligns with the gene accession number as a point of reference only. However, individual transcript sequences of the same gene can differ through

naturally occurring variations (e.g. polymorphisms), each with its own valid existence. This clone is substantially in agreement with the reference, but a complete review of all prevailing

variants is recommended prior to use. More info

OTI Annotation: This clone was engineered to express the complete ORF with an expression tag. Expression

varies depending on the nature of the gene.

RefSeq: <u>NM 001164815.1</u>, <u>NP 001158287.1</u>

 RefSeq ORF:
 3906 bp

 Locus ID:
 22985

UniProt ID: Q9UKV3

Cytogenetics: 14q11.2

Protein Pathways: Spliceosome

MW: 147.2 kDa

Gene Summary:

Apoptosis is defined by several morphologic nuclear changes, including chromatin condensation and nuclear fragmentation. This gene encodes a nuclear protein that induces apoptotic chromatin condensation after activation by caspase-3, without inducing DNA fragmentation. This protein has also been shown to be a component of a splicing-dependent multiprotein exon junction complex (EJC) that is deposited at splice junctions on mRNAs, as a consequence of pre-mRNA splicing. It may thus be involved in mRNA metabolism associated with splicing. Alternatively spliced transcript variants encoding different isoforms have been described for this gene. [provided by RefSeq, Oct 2011]
