Product datasheet for RC228740L3V

FHIT (NM_001166243) Human Tagged ORF Clone Lentiviral Particle

Product data:

| Product Type: | Lentiviral Particles |
|------------------------------|---|
| Product Name: | FHIT (NM_001166243) Human Tagged ORF Clone Lentiviral Particle |
| Symbol: | FHIT |
| Synonyms: | AP3Aase; FRA3B |
| Mammalian Cell Selection: | Puromycin |
| Vector: | pLenti-C-Myc-DDK-P2A-Puro (PS100092) |
| Tag: | Myc-DDK |
| ACCN: | NM_001166243 |
| ORF Size: | 441 bp |
| ORF Nucleotide Sequence: | The ORF insert of this clone is exactly the same as(RC228740). |
| OTI Disclaimer: | The molecular sequence of this clone aligns with the gene accession number as a point of reference only. However, individual transcript sequences of the same gene can differ through naturally occurring variations (e.g. polymorphisms), each with its own valid existence. This clone is substantially in agreement with the reference, but a complete review of all prevailing variants is recommended prior to use. <u>More info</u> |
| OTI Annotation: | This clone was engineered to express the complete ORF with an expression tag. Expression varies depending on the nature of the gene. |
| RefSeq: | <u>NM 001166243.1</u> |
| RefSeq Size: | 1122 bp |
| RefSeq ORF: | 444 bp |
| Locus ID: | 2272 |
| UniProt ID: | <u>P49789</u> |
| Cytogenetics: | 3p14.2 |
| Protein Pathways: | Non-small cell lung cancer, Purine metabolism, Small cell lung cancer |
| MW: | 16.9 kDa |

This product is to be used for laboratory only. Not for diagnostic or therapeutic use. ©2022 OriGene Technologies, Inc., 9620 Medical Center Drive, Ste 200, Rockville, MD 20850, US

Gene Summary: The protein encoded by this gene is a P1-P3-bis(5'-adenosyl) triphosphate hydrolase involved in purine metabolism. This gene encompasses the common fragile site FRA3B on chromosome 3, where carcinogen-induced damage can lead to translocations and aberrant transcripts. In fact, aberrant transcripts from this gene have been found in about half of all esophageal, stomach, and colon carcinomas. The encoded protein is also a tumor suppressor, as loss of its activity results in replication stress and DNA damage. [provided by RefSeq, Aug 2017]
