Myelin oligodendrocyte glycoprotein (MOG) (NM_001170418) Human Tagged ORF Clone Lentiviral Particle

Product data:

Product Type: Lentiviral Particles

Product Name: Myelin oligodendrocyte glycoprotein (MOG) (NM_001170418) Human Tagged ORF Clone

Lentiviral Particle

Symbol: Myelin oligodendrocyte glycoprotein
Synonyms: BTN6; BTNL11; MOGIG2; NRCLP7

Mammalian Cell

Selection:

Puromycin

Vector: pLenti-C-mGFP-P2A-Puro (PS100093)

Tag: mGFP

ACCN: NM_001170418

ORF Size: 324 bp

ORF Nucleotide

Sequence:

Cytogenetics:

The ORF insert of this clone is exactly the same as(RC229538).

OTI Disclaimer: The molecular sequence of this clone aligns with the gene accession number as a point of

reference only. However, individual transcript sequences of the same gene can differ through naturally occurring variations (e.g. polymorphisms), each with its own valid existence. This clone is substantially in agreement with the reference, but a complete review of all prevailing

variants is recommended prior to use. More info

OTI Annotation: This clone was engineered to express the complete ORF with an expression tag. Expression

varies depending on the nature of the gene.

RefSeq: <u>NM 001170418.1</u>

 RefSeq ORF:
 327 bp

 Locus ID:
 4340

 UniProt ID:
 Q16653

Protein Families: Transmembrane

6p22.1

MW: 12.6 kDa

Gene Summary:

The product of this gene is a membrane protein expressed on the oligodendrocyte cell surface and the outermost surface of myelin sheaths. Due to this localization, it is a primary target antigen involved in immune-mediated demyelination. This protein may be involved in completion and maintenance of the myelin sheath and in cell-cell communication. Alternatively spliced transcript variants encoding different isoforms have been identified. [provided by RefSeq, Jul 2008]
