### Adiponectin (ADIPOQ) (NM\_001177800) Human Tagged ORF Clone Lentiviral Particle

**Product data:** 

**Product Type:** Lentiviral Particles

Product Name: Adiponectin (ADIPOQ) (NM 001177800) Human Tagged ORF Clone Lentiviral Particle

Symbol: Adiponectin

Synonyms: ACDC; ACRP30; ADIPQTL1; ADPN; APM-1; APM1; GBP28

Mammalian Cell

Selection:

Puromycin

**Vector:** pLenti-C-mGFP-P2A-Puro (PS100093)

Tag: mGFP

**ACCN:** NM\_001177800

ORF Size: 732 bp

**ORF Nucleotide** 

The ORF insert of this clone is exactly the same as(RC229756).

Sequence:

OTI Disclaimer:

The molecular sequence of this clone aligns with the gene accession number as a point of reference only. However, individual transcript sequences of the same gene can differ through naturally occurring variations (e.g. polymorphisms), each with its own valid existence. This clone is substantially in agreement with the reference, but a complete review of all prevailing

variants is recommended prior to use. More info

**OTI Annotation:** This clone was engineered to express the complete ORF with an expression tag. Expression

varies depending on the nature of the gene.

**RefSeg:** NM 001177800.1

 RefSeq ORF:
 735 bp

 Locus ID:
 9370

 UniProt ID:
 Q15848

 Cytogenetics:
 3q27.3

**Protein Families:** Druggable Genome, Secreted Protein

Protein Pathways: Adipocytokine signaling pathway, PPAR signaling pathway, Type II diabetes mellitus

**MW:** 26.9 kDa

# Adiponectin (ADIPOQ) (NM\_001177800) Human Tagged ORF Clone Lentiviral Particle – RC229756L4V

#### **Gene Summary:**

This gene is expressed in adipose tissue exclusively. It encodes a protein with similarity to collagens X and VIII and complement factor C1q. The encoded protein circulates in the plasma and is involved with metabolic and hormonal processes. Mutations in this gene are associated with adiponectin deficiency. Multiple alternatively spliced variants, encoding the same protein, have been identified. [provided by RefSeq, Apr 2010]
