# Product datasheet for RC230445L4V

## DDX4 (NM\_001166533) Human Tagged ORF Clone Lentiviral Particle

### **Product data:**

Lentiviral Particles
DDX4 (NM_001166533) Human Tagged ORF Clone Lentiviral Particle
DDX4
VASA
Puromycin
pLenti-C-mGFP-P2A-Puro (PS100093)
mGFP
NM_001166533
2112 bp
The ORF insert of this clone is exactly the same as(RC230445).
The molecular sequence of this clone aligns with the gene accession number as a point of reference only. However, individual transcript sequences of the same gene can differ through naturally occurring variations (e.g. polymorphisms), each with its own valid existence. This clone is substantially in agreement with the reference, but a complete review of all prevailing variants is recommended prior to use. <u>More info</u>
This clone was engineered to express the complete ORF with an expression tag. Expression varies depending on the nature of the gene.
<u>NM 001166533.1, NP 001160005.1</u>
2115 bp
54514
<u>Q9NQI0</u>
5q11.2
77.5 kDa

This product is to be used for laboratory only. Not for diagnostic or therapeutic use. ©2022 OriGene Technologies, Inc., 9620 Medical Center Drive, Ste 200, Rockville, MD 20850, US

#### DDX4 (NM\_001166533) Human Tagged ORF Clone Lentiviral Particle – RC230445L4V

Gene Summary:DEAD box proteins, characterized by the conserved motif Asp-Glu-Ala-Asp (DEAD), are<br/>putative RNA helicases. They are implicated in a number of cellular processes involving<br/>alteration of RNA secondary structure such as translation initiation, nuclear and<br/>mitochondrial splicing, and ribosome and spliceosome assembly. Based on their distribution<br/>patterns, some members of this family are believed to be involved in embryogenesis,<br/>spermatogenesis, and cellular growth and division. This gene encodes a DEAD box protein,<br/>which is a homolog of VASA proteins in Drosophila and several other species. The gene is<br/>specifically expressed in the germ cell lineage in both sexes and functions in germ cell<br/>development. Multiple transcript variants encoding different isoforms have been found for<br/>this gene. [provided by RefSeq, Oct 2009]
