

# Product datasheet for RC230885L4

## PLK4 (NM\_001190801) Human Tagged Lenti ORF Clone

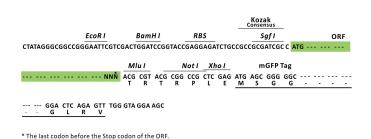

### **Product data:**

**Cloning Scheme:** 

Tag:

#### **Product Type: Expression Plasmids Product Name:** PLK4 (NM\_001190801) Human Tagged Lenti ORF Clone mGFP Symbol: PLK4 Synonyms: MCCRP2; SAK; STK18 **Mammalian Cell** Puromycin Selection: Vector: pLenti-C-mGFP-P2A-Puro (PS100093) E. coli Selection: Chloramphenicol (34 ug/mL) The ORF insert of this clone is exactly the same as(RC230885). **ORF** Nucleotide Sequence: **Restriction Sites:** Sgfl-Mlul

ACCN: **ORF Size:**  NM\_001190801 2913 bp

	<4 (NM_001190801) Human Tagged Lenti ORF Clone – RC230885L4
OTI Disclaimer:	Due to the inherent nature of this plasmid, standard methods to replicate additional amounts of DNA in E. coli are highly likely to result in mutations and/or rearrangements. Therefore, OriGene does not guarantee the capability to replicate this plasmid DNA. Additional amounts of DNA can be purchased from OriGene with batch-specific, full-sequence verification at a reduced cost. Please contact our customer care team at <u>custsupport@origene.com</u> or by calling 301.340.3188 option 3 for pricing and delivery.
	The molecular sequence of this clone aligns with the gene accession number as a point of reference only. However, individual transcript sequences of the same gene can differ through naturally occurring variations (e.g. polymorphisms), each with its own valid existence. This clone is substantially in agreement with the reference, but a complete review of all prevailing variants is recommended prior to use. <u>More info</u>
OTI Annotation:	This clone was engineered to express the complete ORF with an expression tag. Expression varies depending on the nature of the gene.
Components:	The ORF clone is ion-exchange column purified and shipped in a 2D barcoded Matrix tube containing 10ug of transfection-ready, dried plasmid DNA (reconstitute with 100 ul of water).
Reconstitution Meth	<ul> <li>od: 1. Centrifuge at 5,000xg for 5min.</li> <li>2. Carefully open the tube and add 100ul of sterile water to dissolve the DNA.</li> <li>3. Close the tube and incubate for 10 minutes at room temperature.</li> <li>4. Briefly vortex the tube and then do a quick spin (less than 5000xg) to concentrate the liquid at the bottom.</li> <li>5. Store the suspended plasmid at -20°C. The DNA is stable for at least one year from date of shipping when stored at -20°C.</li> </ul>
RefSeq:	<u>NM 001190801.1, NP 001177730.1</u>
RefSeq Size:	3693 bp
RefSeq ORF:	2790 bp
Locus ID:	10733
UniProt ID:	000444
Cytogenetics:	4q28.1
Protein Families:	Druggable Genome, Protein Kinase
MW:	109 kDa
Gene Summary:	This gene encodes a member of the polo family of serine/threonine protein kinases. The protein localizes to centrioles, complex microtubule-based structures found in centrosomes, and regulates centriole duplication during the cell cycle. Three alternatively spliced transcript variants that encode different protein isoforms have been found for this gene. [provided by RefSeq, Jun 2010]
