## Product datasheet for RC231030L4V

## VPS24 (CHMP3) (NM\_001193517) Human Tagged ORF Clone Lentiviral Particle

## **Product data:**

Product Type:	Lentiviral Particles
Product Name:	VPS24 (CHMP3) (NM_001193517) Human Tagged ORF Clone Lentiviral Particle
Symbol:	CHMP3
Synonyms:	CGI-149; NEDF; VPS24
Mammalian Cell Selection:	Puromycin
Vector:	pLenti-C-mGFP-P2A-Puro (PS100093)
Tag:	mGFP
ACCN:	NM_001193517
ORF Size:	546 bp
ORF Nucleotide Sequence:	The ORF insert of this clone is exactly the same as(RC231030).
OTI Disclaimer:	The molecular sequence of this clone aligns with the gene accession number as a point of reference only. However, individual transcript sequences of the same gene can differ through naturally occurring variations (e.g. polymorphisms), each with its own valid existence. This clone is substantially in agreement with the reference, but a complete review of all prevailing variants is recommended prior to use. <u>More info</u>
OTI Annotation:	This clone was engineered to express the complete ORF with an expression tag. Expression varies depending on the nature of the gene.
RefSeq:	<u>NM 001193517.1</u>
RefSeq ORF:	549 bp
Locus ID:	51652
UniProt ID:	<u>Q9Y3E7</u>
Cytogenetics:	2p11.2
Protein Pathways:	Endocytosis
MW:	21.2 kDa

This product is to be used for laboratory only. Not for diagnostic or therapeutic use. ©2022 OriGene Technologies, Inc., 9620 Medical Center Drive, Ste 200, Rockville, MD 20850, US

Gene Summary:This gene encodes a protein that sorts transmembrane proteins into lysosomes/vacuoles via<br/>the multivesicular body (MVB) pathway. This protein, along with other soluble coiled-coil<br/>containing proteins, forms part of the ESCRT-III protein complex that binds to the endosomal<br/>membrane and recruits additional cofactors for protein sorting into the MVB. This protein<br/>may also co-immunoprecipitate with a member of the IFG-binding protein superfamily.<br/>Alternative splicing results in multiple transcript variants. Read-through transcription also<br/>exists between this gene and the upstream ring finger protein 103 (RNF103) gene. [provided<br/>by RefSeq, Nov 2010]
