

## Product datasheet for **RC231066**

### CLDN24 (NM\_001185149) Human Tagged ORF Clone

#### Product data:

Product Type:	Expression Plasmids
Product Name:	CLDN24 (NM_001185149) Human Tagged ORF Clone
Tag:	Myc-DDK
Symbol:	CLDN24
Synonyms:	CLDN21
Mammalian Cell Selection:	Neomycin
Vector:	pCMV6-Entry (PS100001)
E. coli Selection:	Kanamycin (25 ug/mL)
ORF Nucleotide Sequence:	>RC231066 representing NM_001185149 Red=Cloning site Blue=ORF Green=Tags(s)

**Chromatograms:** [https://cdn.origene.com/chromatograms/ja1255\\_d07.zip](https://cdn.origene.com/chromatograms/ja1255_d07.zip)

**Restriction Sites:** SgfI-MluI

**Cloning Scheme:**

**ACCN:** NM\_001185149

**ORF Size:** 660 bp

**OTI Disclaimer:** The molecular sequence of this clone aligns with the gene accession number as a point of reference only. However, individual transcript sequences of the same gene can differ through naturally occurring variations (e.g. polymorphisms), each with its own valid existence. This clone is substantially in agreement with the reference, but a complete review of all prevailing variants is recommended prior to use. [More info](#)

**OTI Annotation:** This clone was engineered to express the complete ORF with an expression tag. Expression varies depending on the nature of the gene.

**Components:** The ORF clone is ion-exchange column purified and shipped in a 2D barcoded Matrix tube containing 10ug of transfection-ready, dried plasmid DNA (reconstitute with 100 ul of water).

**Reconstitution Method:**

1. Centrifuge at 5,000xg for 5min.
2. Carefully open the tube and add 100ul of sterile water to dissolve the DNA.
3. Close the tube and incubate for 10 minutes at room temperature.
4. Briefly vortex the tube and then do a quick spin (less than 5000xg) to concentrate the liquid at the bottom.
5. Store the suspended plasmid at -20°C. The DNA is stable for at least one year from date of shipping when stored at -20°C.

**RefSeq:** [NM\\_001185149.1](#), [NP\\_001172078.1](#)

**RefSeq ORF:** 663 bp

**Locus ID:** 100132463

**UniProt ID:** [A6NM45](#)

**Cytogenetics:** 4q35.1

**MW:** 24.9 kDa

**Gene Summary:** This gene encodes a member of the claudin family. Claudins are integral membrane proteins and components of tight junction strands. Tight junction strands serve as a physical barrier to prevent solutes and water from passing freely through the paracellular space between epithelial or endothelial cell sheets, and also play critical roles in maintaining cell polarity and signal transductions. The protein encoded by this gene is 75% identical to the mouse homolog. This gene is upstream of the CLDN22 gene, which overlaps the WWC2 gene on the opposite strand in the genome.[provided by RefSeq, Aug 2010]
