## Product datasheet for RC231292L3V

## PODN (NM\_001199082) Human Tagged ORF Clone Lentiviral Particle

## **Product data:**

| Product Type:                | Lentiviral Particles  |
|------------------------------|---|
| Product Name:                | PODN (NM_001199082) Human Tagged ORF Clone Lentiviral Particle  |
| Symbol:                      | PODN  |
| Synonyms:                    | PCAN; SLRR5A  |
| Mammalian Cell<br>Selection: | Puromycin   |
| Vector:                      | pLenti-C-Myc-DDK-P2A-Puro (PS100092)  |
| Tag:                         | Myc-DDK   |
| ACCN:                        | NM_001199082  |
| ORF Size:                    | 1557 bp   |
| ORF Nucleotide<br>Sequence:  | The ORF insert of this clone is exactly the same as(RC231292).  |
| OTI Disclaimer:              | The molecular sequence of this clone aligns with the gene accession number as a point of reference only. However, individual transcript sequences of the same gene can differ through naturally occurring variations (e.g. polymorphisms), each with its own valid existence. This clone is substantially in agreement with the reference, but a complete review of all prevailing variants is recommended prior to use. <u>More info</u> |
| OTI Annotation:              | This clone was engineered to express the complete ORF with an expression tag. Expression varies depending on the nature of the gene.  |
| RefSeq:                      | <u>NM 001199082.1, NP 001186011.1</u>   |
| RefSeq ORF:                  | 1560 bp   |
| Locus ID:                    | 127435  |
| Cytogenetics:                | 1p32.3  |
| Protein Families:            | Secreted Protein  |
| MW:                          | 58.3 kDa  |
|                              |   |

This product is to be used for laboratory only. Not for diagnostic or therapeutic use. ©2022 OriGene Technologies, Inc., 9620 Medical Center Drive, Ste 200, Rockville, MD 20850, US

Gene Summary:The protein encoded by this gene is a member of the small leucine-rich repeat protein family<br/>and contains an amino terminal CX3CXCX7C cysteine-rich cluster followed by a leucine-rich<br/>repeat domain. Studies suggest that this protein could function to inhibit smooth muscle cell<br/>proliferation and migration following arterial injury. [provided by RefSeq, Jul 2016]
