

# Product datasheet for RC231404L4

## CD22 (NM\_001185099) Human Tagged Lenti ORF Clone

### **Product data:**

#### **Product Type: Expression Plasmids Product Name:** CD22 (NM 001185099) Human Tagged Lenti ORF Clone Tag: mGFP Symbol: CD22 SIGLEC-2; SIGLEC2 Synonyms: **Mammalian Cell** Puromycin Selection: Vector: pLenti-C-mGFP-P2A-Puro (PS100093) E. coli Selection: Chloramphenicol (34 ug/mL) The ORF insert of this clone is exactly the same as(RC231404). **ORF** Nucleotide Sequence: **Restriction Sites:** Sgfl-Mlul **Cloning Scheme:** Cloning sites used for ORF Shuttling: ORF Sqf I Mlu I --- GCG ATC GC C ATG --- //--- NNN ACG CGT ---

ACCN: ORF Size: NM\_001185099 2277 bp

<b>ORIGENE</b> CD22	(NM_001185099) Human Tagged Lenti ORF Clone – RC231404L4
OTI Disclaimer:	Due to the inherent nature of this plasmid, standard methods to replicate additional amounts of DNA in E. coli are highly likely to result in mutations and/or rearrangements. Therefore, OriGene does not guarantee the capability to replicate this plasmid DNA. Additional amounts of DNA can be purchased from OriGene with batch-specific, full-sequence verification at a reduced cost. Please contact our customer care team at <u>custsupport@origene.com</u> or by calling 301.340.3188 option 3 for pricing and delivery.
	The molecular sequence of this clone aligns with the gene accession number as a point of reference only. However, individual transcript sequences of the same gene can differ through naturally occurring variations (e.g. polymorphisms), each with its own valid existence. This clone is substantially in agreement with the reference, but a complete review of all prevailing variants is recommended prior to use. <u>More info</u>
OTI Annotation:	This clone was engineered to express the complete ORF with an expression tag. Expression varies depending on the nature of the gene.
Components:	The ORF clone is ion-exchange column purified and shipped in a 2D barcoded Matrix tube containing 10ug of transfection-ready, dried plasmid DNA (reconstitute with 100 ul of water).
Reconstitution Method	<ol> <li>Centrifuge at 5,000xg for 5min.</li> <li>Carefully open the tube and add 100ul of sterile water to dissolve the DNA.</li> <li>Close the tube and incubate for 10 minutes at room temperature.</li> <li>Briefly vortex the tube and then do a quick spin (less than 5000xg) to concentrate the liquid at the bottom.</li> <li>Store the suspended plasmid at -20°C. The DNA is stable for at least one year from date of shipping when stored at -20°C.</li> </ol>
RefSeq:	<u>NM 001185099.1</u>
RefSeq Size:	3036 bp
RefSeq ORF:	2280 bp
Locus ID:	933
UniProt ID:	<u>P20273</u>
Cytogenetics:	19q13.12
Protein Families:	Druggable Genome, Transmembrane
Protein Pathways:	B cell receptor signaling pathway, Cell adhesion molecules (CAMs), Hematopoietic cell lineage
MW:	85.7 kDa

This product is to be used for laboratory only. Not for diagnostic or therapeutic use. ©2024 OriGene Technologies, Inc., 9620 Medical Center Drive, Ste 200, Rockville, MD 20850, US

### CD22 (NM\_001185099) Human Tagged Lenti ORF Clone – RC231404L4

Gene Summary:Mediates B-cell B-cell interactions. May be involved in the localization of B-cells in lymphoid<br/>tissues. Binds sialylated glycoproteins; one of which is CD45. Preferentially binds to alpha-2,6-<br/>linked sialic acid. The sialic acid recognition site can be masked by cis interactions with sialic<br/>acids on the same cell surface. Upon ligand induced tyrosine phosphorylation in the immune<br/>response seems to be involved in regulation of B-cell antigen receptor signaling. Plays a role<br/>in positive regulation through interaction with Src family tyrosine kinases and may also act as<br/>an inhibitory receptor by recruiting cytoplasmic phosphatases via their SH2 domains that<br/>block signal transduction through dephosphorylation of signaling molecules.<br/>[UniProtKB/Swiss-Prot Function]
