

Product datasheet for RC240211

TET3 (NM_001287491) Human Tagged ORF Clone

Product data:

Product Type: Expression Plasmids
Product Name: TET3 (NM_001287491) Human Tagged ORF Clone
Tag: Myc-DDK
Symbol: TET3
Synonyms: BEFAHRS; hCG_40738
Vector: pCMV6-Entry (PS100001)
E. coli Selection: Kanamycin (25 ug/mL)
Cell Selection: Neomycin
ORF Nucleotide Sequence: >RC240211 representing NM_001287491
Red=Cloning site Blue=ORF Green=Tags(s)

Restriction Sites:

Sgfl-MluI

Cloning Scheme:

Plasmid Map:

| | |
|-------------------------------|---|
| ACCN: | NM_001287491 |
| ORF Size: | 5385 bp |
| OTI Disclaimer: | The molecular sequence of this clone aligns with the gene accession number as a point of reference only. However, individual transcript sequences of the same gene can differ through naturally occurring variations (e.g. polymorphisms), each with its own valid existence. This clone is substantially in agreement with the reference, but a complete review of all prevailing variants is recommended prior to use. More info |
| OTI Annotation: | This clone was engineered to express the complete ORF with an expression tag. Expression varies depending on the nature of the gene. |
| Components: | The ORF clone is ion-exchange column purified and shipped in a 2D barcoded Matrix tube containing 10ug of transfection-ready, dried plasmid DNA (reconstitute with 100 ul of water). |
| Reconstitution Method: | <ol style="list-style-type: none">1. Centrifuge at 5,000xg for 5min.2. Carefully open the tube and add 100ul of sterile water to dissolve the DNA.3. Close the tube and incubate for 10 minutes at room temperature.4. Briefly vortex the tube and then do a quick spin (less than 5000xg) to concentrate the liquid at the bottom.5. Store the suspended plasmid at -20°C. The DNA is stable for at least one year from date of shipping when stored at -20°C. |
| RefSeq: | NM_001287491.2 |
| RefSeq Size: | 11405 bp |
| RefSeq ORF: | 5388 bp |
| Locus ID: | 200424 |
| UniProt ID: | O43151 |
| Cytogenetics: | 2p13.1 |
| Protein Families: | Transcription Factors |
| MW: | 194.2 kDa |
| Gene Summary: | Members of the ten-eleven translocation (TET) gene family, including TET3, play a role in the DNA methylation process (Langemeijer et al., 2009 [PubMed 19923888]).[supplied by OMIM, Nov 2010] |
