

Product datasheet for RG200359

LONP1 (NM_004793) Human Tagged ORF Clone

Product data:

Product Type: Expression Plasmids

Product Name: LONP1 (NM_004793) Human Tagged ORF Clone

Tag: TurboGFP

Symbol: LONP1

Synonyms: CODASS; hLON; LON; LONP; PIM1; PRSS15

Mammalian Cell

Selection:

Neomycin

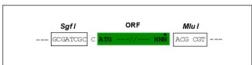

Vector: pCMV6-AC-GFP (PS100010)

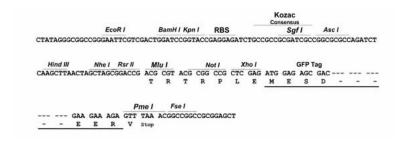

E. coli Selection: Ampicillin (100 ug/mL)

Restriction Sites: Sgfl-Mlul

Cloning Scheme:

Cloning sites used for ORF Shuttling:

ACCN: NM_004793

ORF Size: 2877 bp

OriGene Technologies, Inc. 9620 Medical Center Drive, Ste 200

LONP1 (NM_004793) Human Tagged ORF Clone - RG200359

OTI Disclaimer: The molecular sequence of this clone aligns with the gene accession number as a point of

reference only. However, individual transcript sequences of the same gene can differ through naturally occurring variations (e.g. polymorphisms), each with its own valid existence. This clone is substantially in agreement with the reference, but a complete review of all prevailing

variants is recommended prior to use. More info

OTI Annotation: This clone was engineered to express the complete ORF with an expression tag. Expression

varies depending on the nature of the gene.

Components: The ORF clone is ion-exchange column purified and shipped in a 2D barcoded Matrix tube

containing 10ug of transfection-ready, dried plasmid DNA (reconstitute with 100 ul of water).

Reconstitution Method: 1. Centrifuge at 5,000xg for 5min.

2. Carefully open the tube and add 100ul of sterile water to dissolve the DNA.

3. Close the tube and incubate for 10 minutes at room temperature.

4. Briefly vortex the tube and then do a quick spin (less than 5000xg) to concentrate the liquid

at the bottom.

5. Store the suspended plasmid at -20°C. The DNA is stable for at least one year from date of

shipping when stored at -20°C.

Note: Plasmids are not sterile. For experiments where strict sterility is required, filtration with

0.22um filter is required.

RefSeq: <u>NM 004793.4</u>

RefSeq Size: 3111 bp
RefSeq ORF: 2880 bp
Locus ID: 9361

 UniProt ID:
 P36776

 Cytogenetics:
 19p13.3

Domains: LON, AAA, AAA

Protein Families: Druggable Genome, Protease

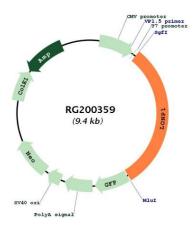

Gene Summary: This gene encodes a mitochondrial matrix protein that belongs to the Lon family of ATP-

dependent proteases. This protein mediates the selective degradation of misfolded, unassembled or oxidatively damaged polypeptides in the mitochondrial matrix. It may also have a chaperone function in the assembly of inner membrane protein complexes, and participate in the regulation of mitochondrial gene expression and maintenance of the integrity of the mitochondrial genome. Decreased expression of this gene has been noted in a patient with hereditary spastic paraplegia (PMID:18378094). Alternatively spliced transcript

variants have been found for this gene. [provided by RefSeq, Feb 2013]
