

# Product datasheet for RG207788

## PKN1 (NM\_002741) Human Tagged ORF Clone

### **Product data:**

Product Type:

**Product Name:** 

# **Expression Plasmids** PKN1 (NM\_002741) Human Tagged ORF Clone TurboGFP PKN1 DBK; PAK-1; PAK1; PKN; PKN-ALPHA; PRK1; PRKCL1

**Mammalian Cell** 

- Selection:
- Vector:

Tag:

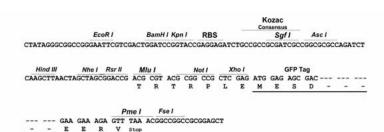

Symbol:

Synonyms:

- E. coli Selection:
- **Restriction Sites:**
- **Cloning Scheme:**

Neomycin pCMV6-AC-GFP (PS100010) Ampicillin (100 ug/mL) Sgfl-Mlul Cloning sites used for ORF Shuttling:

ACCN: **ORF Size:** 

NM\_002741 2826 bp

<b>ORIGENE</b> PKN1 (	NM_002741) Human Tagged ORF Clone – RG207788
OTI Disclaimer:	The molecular sequence of this clone aligns with the gene accession number as a point of reference only. However, individual transcript sequences of the same gene can differ through naturally occurring variations (e.g. polymorphisms), each with its own valid existence. This clone is substantially in agreement with the reference, but a complete review of all prevailing variants is recommended prior to use. <u>More info</u>
OTI Annotation:	This clone was engineered to express the complete ORF with an expression tag. Expression varies depending on the nature of the gene.
Components:	The ORF clone is ion-exchange column purified and shipped in a 2D barcoded Matrix tube containing 10ug of transfection-ready, dried plasmid DNA (reconstitute with 100 ul of water).
Reconstitution Method:	<ol> <li>Centrifuge at 5,000xg for 5min.</li> <li>Carefully open the tube and add 100ul of sterile water to dissolve the DNA.</li> <li>Close the tube and incubate for 10 minutes at room temperature.</li> <li>Briefly vortex the tube and then do a quick spin (less than 5000xg) to concentrate the liquid at the bottom.</li> <li>Store the suspended plasmid at -20°C. The DNA is stable for at least one year from date of shipping when stored at -20°C.</li> </ol>
Note:	Plasmids are not sterile. For experiments where strict sterility is required, filtration with 0.22um filter is required.
RefSeq:	<u>NM 002741.3, NP 002732.3</u>
RefSeq Size:	3097 bp
RefSeq ORF:	2829 bp
Locus ID:	5585
UniProt ID:	<u>Q16512</u>
Cytogenetics:	19p13.12
Domains:	pkinase, HR1, S_TK_X, TyrKc, S_TKc
Protein Families:	Druggable Genome, Protein Kinase
Gene Summary:	The protein encoded by this gene belongs to the protein kinase C superfamily. This kinase is activated by Rho family of small G proteins and may mediate the Rho-dependent signaling pathway. This kinase can be activated by phospholipids and by limited proteolysis. The 3-phosphoinositide dependent protein kinase-1 (PDPK1/PDK1) is reported to phosphorylate this kinase, which may mediate insulin signals to the actin cytoskeleton. The proteolytic activation of this kinase by caspase-3 or related proteases during apoptosis suggests its role in signal

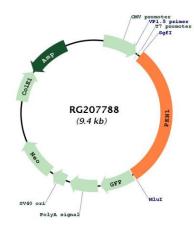

isoforms have been observed. [provided by RefSeq, Jul 2008]

transduction related to apoptosis. Alternatively spliced transcript variants encoding distinct
