

Product datasheet for RG209345

WFDC11 (NM 147197) Human Tagged ORF Clone

Product data:

Product Type: Expression Plasmids

Product Name: WFDC11 (NM_147197) Human Tagged ORF Clone

Tag: TurboGFP
Symbol: WFDC11
Synonyms: WAP11

Mammalian Cell Neomycin

Selection:

Vector: pCMV6-AC-GFP (PS100010)

E. coli Selection: Ampicillin (100 ug/mL)

ORF Nucleotide >RG209345 representing NM_147197

Sequence: Red=Cloning site Blue=ORF Green=Tags(s)

Cloning Scheme:

ACCN: NM_147197

ORF Size: 261 bp

OTI Disclaimer: Due to the inherent nature of this plasmid, standard methods to replicate additional amounts

of DNA in E. coli are highly likely to result in mutations and/or rearrangements. Therefore, OriGene does not guarantee the capability to replicate this plasmid DNA. Additional amounts of DNA can be purchased from OriGene with batch-specific, full-sequence verification at a reduced cost. Please contact our customer care team at customercom or by

calling 301.340.3188 option 3 for pricing and delivery.

The molecular sequence of this clone aligns with the gene accession number as a point of reference only. However, individual transcript sequences of the same gene can differ through naturally occurring variations (e.g. polymorphisms), each with its own valid existence. This clone is substantially in agreement with the reference, but a complete review of all prevailing

variants is recommended prior to use. More info

OTI Annotation: This clone was engineered to express the complete ORF with an expression tag. Expression

varies depending on the nature of the gene.

Components: The ORF clone is ion-exchange column purified and shipped in a 2D barcoded Matrix tube

containing 10ug of transfection-ready, dried plasmid DNA (reconstitute with 100 ul of water).

Reconstitution Method:

- 1. Centrifuge at 5,000xg for 5min.
- 2. Carefully open the tube and add 100ul of sterile water to dissolve the DNA.
- 3. Close the tube and incubate for 10 minutes at room temperature.
- 4. Briefly vortex the tube and then do a quick spin (less than 5000xg) to concentrate the liquid at the bottom.

5. Store the suspended plasmid at -20°C. The DNA is stable for at least one year from date of shipping when stored at -20°C.

RefSeq: <u>NM 147197.2</u>, <u>NP 671730.1</u>

RefSeq Size: 615 bp
RefSeq ORF: 264 bp
Locus ID: 259239
UniProt ID: Q8NEX6
Cytogenetics: 20q13.12

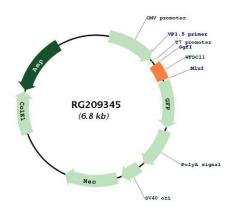

Protein Families: Secreted Protein, Transmembrane

Gene Summary: This gene encodes a member of the WAP-type four-disulfide core (WFDC) domain family. The

WFDC domain, or WAP signature motif, contains eight cysteines forming four disulfide bonds at the core of the protein, and functions as a protease inhibitor. Most WFDC gene members are localized to chromosome 20q12-q13 in two clusters: centromeric and telomeric. This

gene belongs to the telomeric cluster. [provided by RefSeq, Jul 2008]
