

Product datasheet for **RG239967**

ADNP (NM_001282531) Human Tagged ORF Clone

Product data:

Product Type:	Expression Plasmids
Product Name:	ADNP (NM_001282531) Human Tagged ORF Clone
Tag:	TurboGFP
Symbol:	ADNP
Synonyms:	ADNP1; HVDAS; MRD28
Mammalian Cell Selection:	Neomycin
Vector:	pCMV6-AC-GFP (PS100010)
E. coli Selection:	Ampicillin (100 ug/mL)
ORF Nucleotide Sequence:	>RG239967 representing NM_001282531. Blue=ORF Red=Cloning site Green=Tag(s)

Restriction Sites:

Sgfl-MluI

Cloning Scheme:

- ACCN:** NM_001282531
- ORF Size:** 3306 bp
- OTI Disclaimer:** The molecular sequence of this clone aligns with the gene accession number as a point of reference only. However, individual transcript sequences of the same gene can differ through naturally occurring variations (e.g. polymorphisms), each with its own valid existence. This clone is substantially in agreement with the reference, but a complete review of all prevailing variants is recommended prior to use. [More info](#)
- OTI Annotation:** This clone was engineered to express the complete ORF with an expression tag. Expression varies depending on the nature of the gene.
- Components:** The ORF clone is ion-exchange column purified and shipped in a 2D barcoded Matrix tube containing 10ug of transfection-ready, dried plasmid DNA (reconstitute with 100 ul of water).
- RefSeq:** [NM_001282531.3](#)
- RefSeq Size:** 6242 bp
- RefSeq ORF:** 3309 bp
- Locus ID:** 23394
- UniProt ID:** [Q9H2P0](#)
- Cytogenetics:** 20q13.13
- Protein Families:** Transcription Factors
- MW:** 123.4 kDa

Gene Summary:

Vasoactive intestinal peptide is a neuroprotective factor that has a stimulatory effect on the growth of some tumor cells and an inhibitory effect on others. This gene encodes a protein that is upregulated by vasoactive intestinal peptide and may be involved in its stimulatory effect on certain tumor cells. The encoded protein contains one homeobox and nine zinc finger domains, suggesting that it functions as a transcription factor. This gene is also upregulated in normal proliferative tissues. Finally, the encoded protein may increase the viability of certain cell types through modulation of p53 activity. Alternatively spliced transcript variants encoding the same protein have been described. [provided by RefSeq, Jul 2008]
