

Product datasheet for **RN202446**

Dcc (NM_012841) Rat Untagged Clone

Product data:

Product Type:	Expression Plasmids
Product Name:	Dcc (NM_012841) Rat Untagged Clone
Tag:	Tag Free
Symbol:	Dcc
Mammalian Cell Selection:	Neomycin
Vector:	pCMV6-Entry (PS100001)
E. coli Selection:	Kanamycin (25 ug/mL)
Restriction Sites:	Sgfl-Mlul
ACCN:	NM_012841
Insert Size:	4338 bp
OTI Disclaimer:	Our molecular clone sequence data has been matched to the reference identifier above as a point of reference. Note that the complete sequence of our molecular clones may differ from the sequence published for this corresponding reference, e.g., by representing an alternative RNA splicing form or single nucleotide polymorphism (SNP).
Components:	The ORF clone is ion-exchange column purified and shipped in a 2D barcoded Matrix tube containing 10ug of transfection-ready, dried plasmid DNA (reconstitute with 100 ul of water).
Reconstitution Method:	<ol style="list-style-type: none">1. Centrifuge at 5,000xg for 5min.2. Carefully open the tube and add 100ul of sterile water to dissolve the DNA.3. Close the tube and incubate for 10 minutes at room temperature.4. Briefly vortex the tube and then do a quick spin (less than 5000xg) to concentrate the liquid at the bottom.5. Store the suspended plasmid at -20°C. The DNA is stable for at least one year from date of shipping when stored at -20°C.
RefSeq:	NM_012841.1 , NP_036973.1
RefSeq Size:	4924 bp
RefSeq ORF:	4338 bp
Locus ID:	25311

Cytogenetics: 18q12.1

Gene Summary: transmembrane protein of the immunoglobulin superfamily that plays dual roles as a receptor for the chemoattractant netrin-1 and possibly other signalling pathways, and as a gamma-secretase-dependent transcription coactivator [RGD, Feb 2006]
