

Product datasheet for **RN206358**

Mx1 (NM_173096) Rat Untagged Clone

Product data:

Product Type:	Expression Plasmids
Product Name:	Mx1 (NM_173096) Rat Untagged Clone
Tag:	Tag Free
Symbol:	Mx1
Synonyms:	IFI78
Vector:	pCMV6-Entry (PS100001)
E. coli Selection:	Kanamycin (25 ug/mL)
Cell Selection:	Neomycin

[View online »](#)

Fully Sequenced ORF: >RN206358 representing NM_173096
 Red=Cloning site Blue=ORF Orange=Stop codon

- Restriction Sites:** SgfI-MluI
- ACCN:** NM_173096
- Insert Size:** 1959 bp
- OTI Disclaimer:** Our molecular clone sequence data has been matched to the reference identifier above as a point of reference. Note that the complete sequence of our molecular clones may differ from the sequence published for this corresponding reference, e.g., by representing an alternative RNA splicing form or single nucleotide polymorphism (SNP).
- Components:** The ORF clone is ion-exchange column purified and shipped in a 2D barcoded Matrix tube containing 10ug of transfection-ready, dried plasmid DNA (reconstitute with 100 ul of water).

Reconstitution Method:

1. Centrifuge at 5,000xg for 5min.
2. Carefully open the tube and add 100ul of sterile water to dissolve the DNA.
3. Close the tube and incubate for 10 minutes at room temperature.
4. Briefly vortex the tube and then do a quick spin (less than 5000xg) to concentrate the liquid at the bottom.
5. Store the suspended plasmid at -20°C. The DNA is stable for at least one year from date of shipping when stored at -20°C.

RefSeq: [NM_173096.3](#), [NP_775119.2](#)

RefSeq Size: 3361 bp

RefSeq ORF: 1959 bp

Locus ID: 24575

Cytogenetics: 11q12

Gene Summary: mouse homolog is an interferon inducible gene that confers influenza resistance to mice [RGD, Feb 2006]
Transcript Variant: This variant (1) represents the longest transcript. All six variants encode the same protein. Sequence Note: This RefSeq record was created from transcript and genomic sequence data to make the sequence consistent with the reference genome assembly. The genomic coordinates used for the transcript record were based on transcript alignments.
