

Product datasheet for **RN208281**

Tmsb4x (NM_031136) Rat Untagged Clone

Product data:

Product Type: Expression Plasmids
Product Name: Tmsb4x (NM_031136) Rat Untagged Clone
Tag: Tag Free
Symbol: Tmsb4x
Mammalian Cell Selection: Neomycin
Vector: pCMV6-Entry (PS100001)
E. coli Selection: Kanamycin (25 ug/mL)
Fully Sequenced ORF: >RN208281 representing NM_031136
Red=Cloning site Blue=ORF Orange=Stop codon

Restriction Sites: SgfI-MluI

ACCN: NM_031136

Insert Size: 135 bp

OTI Disclaimer: Our molecular clone sequence data has been matched to the reference identifier above as a point of reference. Note that the complete sequence of our molecular clones may differ from the sequence published for this corresponding reference, e.g., by representing an alternative RNA splicing form or single nucleotide polymorphism (SNP).

Components: The ORF clone is ion-exchange column purified and shipped in a 2D barcoded Matrix tube containing 10ug of transfection-ready, dried plasmid DNA (reconstitute with 100 ul of water).

[View online »](#)

Reconstitution Method:

1. Centrifuge at 5,000xg for 5min.
2. Carefully open the tube and add 100ul of sterile water to dissolve the DNA.
3. Close the tube and incubate for 10 minutes at room temperature.
4. Briefly vortex the tube and then do a quick spin (less than 5000xg) to concentrate the liquid at the bottom.
5. Store the suspended plasmid at -20°C. The DNA is stable for at least one year from date of shipping when stored at -20°C.

RefSeq: [NM_031136.1](#), [NP_112398.1](#)

RefSeq Size: 686 bp

RefSeq ORF: 135 bp

Locus ID: 81814

UniProt ID: [P62329](#)

Cytogenetics: Xq13

Gene Summary: may play a role in the regulation of actin dynamics; may be involved in osteoblast differentiation and immune response [RGD, Feb 2006]
