OTI Disclaimer:	reference o naturally oc clone is sub	lar sequence of this clone aligns with the gene accession number as a point of nly. However, individual transcript sequences of the same gene can differ through curring variations (e.g. polymorphisms), each with its own valid existence. This stantially in agreement with the reference, but a complete review of all prevailing ecommended prior to use. <u>More info</u>
OTI Annotation:		as engineered to express the complete ORF with an expression tag. Expression nding on the nature of the gene.
Components:		ne is ion-exchange column purified and shipped in a 2D barcoded Matrix tube Oug of transfection-ready, dried plasmid DNA (reconstitute with 100 ul of water).
