

# Product datasheet for RR202914L3V

## Aadac (NM\_020538) Rat Tagged ORF Clone Lentiviral Particle

### **Product data:**

#### **Product Type: Lentiviral Particles Product Name:** Aadac (NM\_020538) Rat Tagged ORF Clone Lentiviral Particle Symbol: Aadac Aada Synonyms: **Mammalian Cell** Puromycin Selection: Vector: pLenti-C-Myc-DDK-P2A-Puro (PS100092) Myc-DDK Tag: NM 020538 ACCN: ORF Size: 1194 bp The ORF insert of this clone is exactly the same as(RR202914). **ORF** Nucleotide Sequence: **OTI Disclaimer:** The molecular sequence of this clone aligns with the gene accession number as a point of reference only. However, individual transcript sequences of the same gene can differ through naturally occurring variations (e.g. polymorphisms), each with its own valid existence. This clone is substantially in agreement with the reference, but a complete review of all prevailing variants is recommended prior to use. More info **OTI** Annotation: This clone was engineered to express the complete ORF with an expression tag. Expression varies depending on the nature of the gene. **RefSeq:** NM 020538.1, NP 065413.1 **RefSeq Size:** 1645 bp **RefSeq ORF:** 1197 bp Locus ID: 57300 **UniProt ID:** Q9QZH8 Cytogenetics: 2q31

This product is to be used for laboratory only. Not for diagnostic or therapeutic use. ©2022 OriGene Technologies, Inc., 9620 Medical Center Drive, Ste 200, Rockville, MD 20850, US

	Aadac (NM_020538) Rat Tagged ORF Clone Lentiviral Particle – RR202914L3V
Gene Summary:	Displays cellular triglyceride lipase activity in liver, increases the levels of intracellular fatty

acids derived from the hydrolysis of newly formed triglyceride stores and plays a role in very low-density lipoprotein assembly (By similarity). Displays serine esterase activity in liver. Deacetylates a variety of arylacetamide substrates, including xenobiotic compounds and procarcinogens, converting them to the primary arylamide compounds and increasing their toxicity.[UniProtKB/Swiss-Prot Function]
