	Crbn (NM_001015003) Rat Tagged ORF Clone Lentiviral Particle – RR203397L3V
Gene Summary:	Substrate recognition component of a DCX (DDB1-CUL4-X-box) E3 protein ligase complex that mediates the ubiquitination and subsequent proteasomal degradation of target proteins.
	Normal degradation of key regulatory proteins is required for normal limb outgrowth and
	expression of the fibroblast growth factor FGF8 (By similarity). May play a role in memory and

its interaction with KCNT1.[UniProtKB/Swiss-Prot Function]

learning by regulating the assembly and neuronal surface expression of large-conductance calcium-activated potassium channels in brain regions involved in memory and learning via
