

# Product datasheet for RR214434L3V

## Cry1 (NM\_198750) Rat Tagged ORF Clone Lentiviral Particle

### **Product data:**

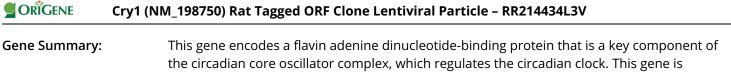

#### **Product Type: Lentiviral Particles Product Name:** Cry1 (NM\_198750) Rat Tagged ORF Clone Lentiviral Particle Symbol: Crv1 MGC124541 Synonyms: **Mammalian Cell** Puromycin Selection: Vector: pLenti-C-Myc-DDK-P2A-Puro (PS100092) Tag: Myc-DDK ACCN: NM 198750 ORF Size: 1764 bp The ORF insert of this clone is exactly the same as(RR214434). **ORF** Nucleotide Sequence: **OTI Disclaimer:** The molecular sequence of this clone aligns with the gene accession number as a point of reference only. However, individual transcript sequences of the same gene can differ through naturally occurring variations (e.g. polymorphisms), each with its own valid existence. This clone is substantially in agreement with the reference, but a complete review of all prevailing variants is recommended prior to use. More info **OTI** Annotation: This clone was engineered to express the complete ORF with an expression tag. Expression varies depending on the nature of the gene. **RefSeq:** NM 198750.2, NP 942045.2 **RefSeq Size:** 2938 bp **RefSeq ORF:** 1767 bp Locus ID: 299691 **UniProt ID:** Q32Q86 Cytogenetics: 7q13

the circadian core oscillator complex, which regulates the circadian clock. This gene is upregulated by Clock/Arntl heterodimers but then represses this upregulation in a feedback loop using Per/Cry heterodimers to interact with Clock/Arntl. Polymorphisms in this gene have been associated with altered sleep patterns. The encoded protein is widely conserved across plants and animals. Loss of the related gene in mouse results in a shortened circadian cycle in complete darkness. [provided by RefSeq, Feb 2014]
