Product datasheet for RR215478L4V

Rasl10a (NM_001108862) Rat Tagged ORF Clone Lentiviral Particle

Product data:

| Product Type: | Lentiviral Particles |
|-----------------------------------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Product Name: | Rasl10a (NM_001108862) Rat Tagged ORF Clone Lentiviral Particle |
| Symbol: | Rasl10a |
| Synonyms: | RGD1306100 |
| Mammalian Cell Selection: | Puromycin |
| Vector: | pLenti-C-mGFP-P2A-Puro (PS100093) |
| Tag: | mGFP |
| ACCN: | NM_001108862 |
| ORF Size: | 183 bp |
| ORF Nucleotide Sequence: | The ORF insert of this clone is exactly the same as(RR215478). |
| | |
| OTI Disclaimer: | The molecular sequence of this clone aligns with the gene accession number as a point of reference only. However, individual transcript sequences of the same gene can differ through naturally occurring variations (e.g. polymorphisms), each with its own valid existence. This clone is substantially in agreement with the reference, but a complete review of all prevailing variants is recommended prior to use. <u>More info</u> |
| OTI Disclaimer: OTI Annotation: | reference only. However, individual transcript sequences of the same gene can differ through naturally occurring variations (e.g. polymorphisms), each with its own valid existence. This clone is substantially in agreement with the reference, but a complete review of all prevailing |
| | reference only. However, individual transcript sequences of the same gene can differ through naturally occurring variations (e.g. polymorphisms), each with its own valid existence. This clone is substantially in agreement with the reference, but a complete review of all prevailing variants is recommended prior to use. <u>More info</u> This clone was engineered to express the complete ORF with an expression tag. Expression |
| OTI Annotation: | reference only.
