

Product datasheet for **SC200009**

Adenylosuccinate Lyase (ADSL) (NM_001123378) Human 3' UTR Clone

Product data:

Product Type:	3' UTR Clones
Product Name:	Adenylosuccinate Lyase (ADSL) (NM_001123378) Human 3' UTR Clone
Vector:	pMirTarget (PS100062)
Symbol:	ADSL
Synonyms:	AMPS; ASASE; ASL
ACCN:	NM_001123378
Insert Size:	2000 bp

[View online »](#)

Insert Sequence: >SC200009 3'UTR clone of NM_001123378
 The sequence shown below is from the reference sequence of NM_001123378. The complete sequence of this clone may contain minor differences, such as SNPs.

Restriction Sites: SgfI-MluI

OTI Disclaimer: Our molecular clone sequence data has been matched to the sequence identifier above as a point of reference. Note that the complete sequence of this clone is largely the same as the reference sequence but may contain minor differences, e.g., single nucleotide polymorphisms (SNPs).

Components: The cDNA clone is shipped in a 2-D bar-coded Matrix tube as 10 ug dried plasmid DNA. The package also includes 100 pmols of both the corresponding 5' and 3' vector primers in separate vials.

RefSeq: [NM_001123378.3](#)

Summary:

The protein encoded by this gene belongs to the lyase 1 family. It is an essential enzyme involved in purine metabolism, and catalyzes two non-sequential reactions in the de novo purine biosynthetic pathway: the conversion of succinylaminoimidazole carboxamide ribotide (SAICAR) to aminoimidazole carboxamide ribotide (AICAR) and the conversion of adenylosuccinate (S-AMP) to adenosine monophosphate (AMP). Mutations in this gene are associated with adenylosuccinase deficiency (ADSLD), a disorder marked with psychomotor retardation, epilepsy or autistic features. Alternatively spliced transcript variants have been found for this gene. [provided by RefSeq, Dec 2015]
