CHMP2A (NM_014453) Human 3' UTR Clone

Product data:

Product Type: 3' UTR Clones

Product Name: CHMP2A (NM_014453) Human 3' UTR Clone

Vector: pMirTarget (PS100062)

Symbol: CHMP2A

Synonyms: BC-2; BC2; CHMP2; VPS2; VPS2A

ACCN: NM_014453

Insert Size: 113 bp

Insert Sequence: >SC200635 3'UTR clone of NM_014453

The sequence shown below is from the reference sequence of NM_014453. The complete

sequence of this clone may contain minor differences, such as SNPs.

Blue=Stop Codon Red=Cloning site

Restriction Sites: Sgfl-Mlul

OTI Disclaimer: Our molecular clone sequence data has been matched to the sequence identifier above as a

point of reference. Note that the complete sequence of this clone is largely the same as the

reference sequence but may contain minor differences, e.g., single nucleotide

polymorphisms (SNPs).

Components: The cDNA clone is shipped in a 2-D bar-coded Matrix tube as 10 ug dried plasmid DNA. The

package also includes 100 pmols of both the corresponding 5' and 3' vector primers in

separate vials.

RefSeg: NM 014453.4

CHMP2A (NM_014453) Human 3' UTR Clone - SC200635

Summary: CHMP2A belongs to the chromatin-modifying protein/charged multivesicular body protein

(CHMP) family. These proteins are components of ESCRT-III (endosomal sorting complex required for transport III), a complex involved in degradation of surface receptor proteins and formation of endocytic multivesicular bodies (MVBs). Some CHMPs have both nuclear and cytoplasmic/vesicular distributions, and one such CHMP, CHMP1A (MIM 164010), is required for both MVB formation and regulation of cell cycle progression (Tsang et al., 2006 [PubMed

16730941]).[supplied by OMIM, Mar 2008]
