

Product datasheet for **SC201587**

TRAPPC2L (NM_016209) Human 3' UTR Clone

Product data:

Product Type:	3' UTR Clones
Product Name:	TRAPPC2L (NM_016209) Human 3' UTR Clone
Symbol:	TRAPPC2L
Synonyms:	HSPC176; PERRB
Mammalian Cell Selection:	Neomycin
Vector:	pMirTarget (PS100062)
ACCN:	NM_016209
Insert Size:	1749 bp

[View online »](#)

Insert Sequence: >SC201587 3'UTR clone of NM_016209
The sequence shown below is from the reference sequence of NM_016209. The complete sequence of this clone may contain minor differences, such as SNPs.
Blue=Stop Codon **Red**=Cloning site

Restriction Sites: Sgfl-MluI

OTI Disclaimer: Our molecular clone sequence data has been matched to the sequence identifier above as a point of reference. Note that the complete sequence of this clone is largely the same as the reference sequence but may contain minor differences , e.g., single nucleotide polymorphisms (SNPs).

Components: The cDNA clone is shipped in a 2-D bar-coded Matrix tube as 10 ug dried plasmid DNA. The package also includes 100 pmols of both the corresponding 5' and 3' vector primers in separate vials.

RefSeq: [NM_016209.5](#)

Summary:	This gene encodes a protein that interacts with the tethering factor trafficking protein particle (TRAPP complex). TRAPP complexes mediate the contact between vesicles and target membranes, and thus, are involved in vesicle-mediated transport of proteins and lipids. The encoded protein is related to the X-linked trafficking protein particle complex 2. A related pseudogene is located on the X chromosome. Alternative splicing results in multiple transcript variants encoding different isoforms. [provided by RefSeq, Jan 2016]
