

Product datasheet for **SC201728**

53BP1 (TP53BP1) (NM_005657) Human 3' UTR Clone

Product data:

Product Type:	3' UTR Clones
Product Name:	53BP1 (TP53BP1) (NM_005657) Human 3' UTR Clone
Vector:	pMirTarget (PS100062)
Symbol:	TP53BP1
Synonyms:	53BP1; p53BP1; p202; TDRD30
ACCN:	NM_005657
Insert Size:	2000 bp

[View online »](#)

Insert Sequence: >SC201728 3'UTR clone of NM_005657
 The sequence shown below is from the reference sequence of NM_005657. The complete sequence of this clone may contain minor differences, such as SNPs.

Restriction Sites: SgfI-MluI

OTI Disclaimer: Our molecular clone sequence data has been matched to the sequence identifier above as a point of reference. Note that the complete sequence of this clone is largely the same as the reference sequence but may contain minor differences, e.g., single nucleotide polymorphisms (SNPs).

Components: The cDNA clone is shipped in a 2-D bar-coded Matrix tube as 10 ug dried plasmid DNA. The package also includes 100 pmols of both the corresponding 5' and 3' vector primers in separate vials.

RefSeq: [NM_005657.4](#)

Summary: This gene encodes a protein that functions in the DNA double-strand break repair pathway choice, promoting non-homologous end joining (NHEJ) pathways, and limiting homologous recombination. This protein plays multiple roles in the DNA damage response, including promoting checkpoint signaling following DNA damage, acting as a scaffold for recruitment of DNA damage response proteins to damaged chromatin, and promoting NHEJ pathways by limiting end resection following a double-strand break. These roles are also important during V(D)J recombination, class switch recombination and at unprotected telomeres. Alternative splicing results in multiple transcript variants encoding different isoforms. [provided by RefSeq, Aug 2017]
