

Product datasheet for **SC202840**

FGL1 (NM_147203) Human 3' UTR Clone

Product data:

Product Type: 3' UTR Clones
Product Name: FGL1 (NM_147203) Human 3' UTR Clone
Symbol: FGL1
Synonyms: HFREP1; HP-041; HPS; LFIRE-1; LFIRE1
Mammalian Cell Selection: Neomycin
Vector: pMirTarget (PS100062)
ACCN: NM_147203
Insert Size: 267 bp

Insert Sequence: >SC202840 3'UTR clone of NM_147203
 The sequence shown below is from the reference sequence of NM_147203. The complete sequence of this clone may contain minor differences, such as SNPs.

```

Restriction Sites: Sgfl-MluI

OTI Disclaimer: Our molecular clone sequence data has been matched to the sequence identifier above as a point of reference. Note that the complete sequence of this clone is largely the same as the reference sequence but may contain minor differences , e.g., single nucleotide polymorphisms (SNPs).

Components: The cDNA clone is shipped in a 2-D bar-coded Matrix tube as 10 ug dried plasmid DNA. The package also includes 100 pmols of both the corresponding 5' and 3' vector primers in separate vials.

Summary:

Fibrinogen-like 1 is a member of the fibrinogen family. This protein is homologous to the carboxy terminus of the fibrinogen beta- and gamma- subunits which contains the four conserved cysteines of fibrinogens and fibrinogen related proteins. However, this protein lacks the platelet-binding site, cross-linking region and a thrombin-sensitive site which are necessary for fibrin clot formation. This protein may play a role in the development of hepatocellular carcinomas. Four alternatively spliced transcript variants encoding the same protein exist for this gene. [provided by RefSeq, Jul 2008]

Locus ID:

2267
