

Product datasheet for SC203279

OriGene Technologies, Inc.

9620 Medical Center Drive, Ste 200 Rockville, MD 20850, US Phone: +1-888-267-4436 https://www.origene.com techsupport@origene.com EU: info-de@origene.com CN: techsupport@origene.cn

PBR (TSPO) (NM_000714) Human 3' UTR Clone

Product data:

Product Type: 3' UTR Clones

Product Name: PBR (TSPO) (NM_000714) Human 3' UTR Clone

Symbol: PBR

Synonyms: BPBS; BZRP; DBI; IBP; MBR; mDRC; PBR; PBS; pk18; PKBS; PTBR

Mammalian Cell

Selection:

Neomycin

Vector: pMirTarget (PS100062)

ACCN: NM_000714

Insert Size: 281 bp

Insert Sequence: >SC203279 3'UTR clone of NM_000714

The sequence shown below is from the reference sequence of NM_000714. The complete

sequence of this clone may contain minor differences, such as SNPs.

Restriction Sites: Sgfl-Mlul

OTI Disclaimer: Our molecular clone sequence data has been matched to the sequence identifier above as a

point of reference. Note that the complete sequence of this clone is largely the same as the

reference sequence but may contain minor differences, e.g., single nucleotide

polymorphisms (SNPs).

Components: The cDNA clone is shipped in a 2-D bar-coded Matrix tube as 10 ug dried plasmid DNA. The

package also includes 100 pmols of both the corresponding 5' and 3' vector primers in

separate vials.

RefSeq: <u>NM 000714.6</u>

PBR (TSPO) (NM_000714) Human 3' UTR Clone - SC203279

Summary: Present mainly in the mitochondrial compartment of peripheral tissues, the protein encoded

by this gene interacts with some benzodiazepines and has different affinities than its endogenous counterpart. The protein is a key factor in the flow of cholesterol into mitochondria to permit the initiation of steroid hormone synthesis. Alternatively spliced transcript variants have been reported; one of the variants lacks an internal exon and is considered non-coding, and the other variants encode the same protein. [provided by RefSeq,

Feb 2012]

Locus ID: 706

MW: 10.4
