## Flightless I (FLII) (NM 002018) Human 3' UTR Clone

**Product data:** 

**Product Type:** 3' UTR Clones

**Product Name:** Flightless I (FLII) (NM\_002018) Human 3' UTR Clone

Symbol: Flightless I FLI; Fli1; FLIL Synonyms: **Mammalian Cell** 

Selection:

Neomycin

Vector: pMirTarget (PS100062)

ACCN: NM 002018

**Insert Size:** 353 bp

**Insert Sequence:** >SC204148 3'UTR clone of NM\_002018

The sequence shown below is from the reference sequence of NM\_002018. The complete

sequence of this clone may contain minor differences, such as SNPs.

**Restriction Sites:** Sgfl-Mlul

**OTI Disclaimer:** Our molecular clone sequence data has been matched to the sequence identifier above as a

point of reference. Note that the complete sequence of this clone is largely the same as the

reference sequence but may contain minor differences, e.g., single nucleotide

polymorphisms (SNPs).

Components: The cDNA clone is shipped in a 2-D bar-coded Matrix tube as 10 ug dried plasmid DNA. The

package also includes 100 pmols of both the corresponding 5' and 3' vector primers in

separate vials.

## Flightless I (FLII) (NM\_002018) Human 3' UTR Clone - SC204148

RefSeq: <u>NM 002018.4</u>

Summary: This gene encodes a protein with a gelsolin-like actin binding domain and an N-terminal

leucine-rich repeat-protein protein interaction domain. The protein is similar to a Drosophila protein involved in early embryogenesis and the structural organization of indirect flight muscle. The gene is located within the Smith-Magenis syndrome region on chromosome 17.
