

Product datasheet for SC204206

CACNA1G (NM 018896) Human 3' UTR Clone

Product data:

Product Type: 3' UTR Clones

Product Name: CACNA1G (NM 018896) Human 3' UTR Clone

Vector: pMirTarget (PS100062)

Symbol: CACNA1G

Synonyms: Ca(V)T.1; Cav3.1; NBR13; SCA42; SCA42ND

ACCN: NM_018896

Insert Size: 753 bp

Insert Sequence: >SC204206 3'UTR clone of NM_018896

The sequence shown below is from the reference sequence of NM_018896. The complete

sequence of this clone may contain minor differences, such as SNPs.

Restriction Sites: Sgfl-Mlul

OTI Disclaimer: Our molecular clone sequence data has been matched to the sequence identifier above as a

point of reference. Note that the complete sequence of this clone is largely the same as the

reference sequence but may contain minor differences, e.g., single nucleotide

polymorphisms (SNPs).

CACNA1G (NM_018896) Human 3' UTR Clone - SC204206

Components: The cDNA clone is shipped in a 2-D bar-coded Matrix tube as 10 ug dried plasmid DNA. The

package also includes 100 pmols of both the corresponding 5' and 3' vector primers in

separate vials.

RefSeq: <u>NM 018896.5</u>

Summary: Voltage-sensitive calcium channels mediate the entry of calcium ions into excitable cells, and

are also involved in a variety of calcium-dependent processes, including muscle contraction, hormone or neurotransmitter release, gene expression, cell motility, cell division, and cell death. This gene encodes a T-type, low-voltage activated calcium channel. The T-type

channels generate currents that are both transient, owing to fast inactivation, and tiny, owing to small conductance. T-type channels are thought to be involved in pacemaker activity, low-threshold calcium spikes, neuronal oscillations and resonance, and rebound burst firing. Many alternatively spliced transcript variants encoding different isoforms have been

described for this gene. [provided by RefSeq, Sep 2011]
