

Product datasheet for **SC204397**

MYBPC1 (NM_206820) Human 3' UTR Clone

Product data:

Product Type: 3' UTR Clones
Product Name: MYBPC1 (NM_206820) Human 3' UTR Clone
Vector: pMirTarget (PS100062)
Symbol: MYBPC1
Synonyms: LCCS4; MYBPCC; MYBPCS; MYOTREM; ssMyBP-C
ACCN: NM_206820
Insert Size: 506 bp
Insert Sequence: >SC204397 3'UTR clone of NM_206820
The sequence shown below is from the reference sequence of NM_206820. The complete sequence of this clone may contain minor differences, such as SNPs.

Restriction Sites: SgfI-MluI

OTI Disclaimer: Our molecular clone sequence data has been matched to the sequence identifier above as a point of reference. Note that the complete sequence of this clone is largely the same as the reference sequence but may contain minor differences, e.g., single nucleotide polymorphisms (SNPs).

Components: The cDNA clone is shipped in a 2-D bar-coded Matrix tube as 10 ug dried plasmid DNA. The package also includes 100 pmols of both the corresponding 5' and 3' vector primers in separate vials.

RefSeq: [NM_206820.3](#)

Summary: This gene encodes a member of the myosin-binding protein C family. Myosin-binding protein C family members are myosin-associated proteins found in the cross-bridge-bearing zone (C region) of A bands in striated muscle. The encoded protein is the slow skeletal muscle isoform of myosin-binding protein C and plays an important role in muscle contraction by recruiting muscle-type creatine kinase to myosin filaments. Mutations in this gene are associated with distal arthrogryposis type I. Alternatively spliced transcript variants encoding multiple isoforms have been observed for this gene. [provided by RefSeq, Dec 2011]

Locus ID: 4604

MW: 19.1
