Dystrobrevin beta (DTNB) (NM_183361) Human 3' UTR Clone

Product data:

Product Type: 3' UTR Clones

Product Name: Dystrobrevin beta (DTNB) (NM_183361) Human 3' UTR Clone

Symbol: Dystrobrevin beta

Mammalian Cell

Selection:

Neomycin

Vector: pMirTarget (PS100062)

ACCN: NM_183361

Insert Size: 370 bp

Insert Sequence: >SC205136 3'UTR clone of NM_183361

The sequence shown below is from the reference sequence of NM_183361. The complete

sequence of this clone may contain minor differences, such as SNPs.

OTI Disclaimer: Our molecular clone sequence data has been matched to the sequence identifier above as a

point of reference. Note that the complete sequence of this clone is largely the same as the

reference sequence but may contain minor differences, e.g., single nucleotide

polymorphisms (SNPs).

Components: The cDNA clone is shipped in a 2-D bar-coded Matrix tube as 10 ug dried plasmid DNA. The

package also includes 100 pmols of both the corresponding 5' and 3' vector primers in

separate vials.

RefSeq: <u>NM 183361.3</u>

Dystrobrevin beta (DTNB) (NM_183361) Human 3' UTR Clone - SC205136

Summary: This gene encodes dystrobrevin beta, a component of the dystrophin-associated protein

complex (DPC). The DPC consists of dystrophin and several integral and peripheral membrane proteins, including dystroglycans, sarcoglycans, syntrophins and dystrobrevin alpha and beta. The DPC localizes to the sarcolemma and its disruption is associated with various forms of muscular dystrophy. Dystrobrevin beta is thought to interact with syntrophin

and the DP71 short form of dystrophin. [provided by RefSeq, Mar 2016]

Locus ID: 1838

MW: 13.5
