

## **Product datasheet for SC205800**

## PPEF1 (NM 152226) Human 3' UTR Clone

**Product data:** 

**Product Type:** 3' UTR Clones

Product Name: PPEF1 (NM 152226) Human 3' UTR Clone

**Vector:** pMirTarget (PS100062)

Symbol: PPEF1

Synonyms: PP7; PPEF; PPP7C; PPP7CA

**ACCN:** NM\_152226

**Insert Size:** 460 bp

The sequence shown below is from the reference sequence of NM $_{-}152226$ . The complete

sequence of this clone may contain minor differences, such as SNPs.

**Restriction Sites:** Sgfl-Mlul

**OTI Disclaimer:** Our molecular clone sequence data has been matched to the sequence identifier above as a

point of reference. Note that the complete sequence of this clone is largely the same as the

reference sequence but may contain minor differences, e.g., single nucleotide

polymorphisms (SNPs).

**Components:** The cDNA clone is shipped in a 2-D bar-coded Matrix tube as 10 ug dried plasmid DNA. The

package also includes 100 pmols of both the corresponding 5' and 3' vector primers in

separate vials.

**RefSeg:** NM 152226.2

## PPEF1 (NM\_152226) Human 3' UTR Clone - SC205800

Summary: This gene encodes a member of the serine/threonine protein phosphatase with EF-hand

motif family. The protein contains a protein phosphatase catalytic domain, and at least two EF-hand calcium-binding motifs in its C terminus. Although its substrate(s) is unknown, the encoded protein has been suggested to play a role in specific sensory neuron function and/or

development. This gene shares high sequence similarity with the Drosophila retinal

degeneration C (rdgC) gene. Several alternatively spliced transcript variants, each encoding a

distinct isoform, have been described. [provided by RefSeq, Jul 2008]

**Locus ID:** 5475

**MW:** 16.9
