

Product datasheet for SC205820

RHOC (NM 001042679) Human 3' UTR Clone

Product data:

Product Type: 3' UTR Clones

Product Name: RHOC (NM_001042679) Human 3' UTR Clone

Symbol: RHOC

Synonyms: ARH9; ARHC; H9; RHOH9

Mammalian Cell

Selection:

Neomycin

Vector: pMirTarget (PS100062)

ACCN: NM_001042679

Insert Size: 439 bp

Insert Sequence: >SC205820 3'UTR clone of NM_001042679

The sequence shown below is from the reference sequence of NM_001042679. The complete

sequence of this clone may contain minor differences, such as SNPs.

Restriction Sites: Sgfl-Mlul

OTI Disclaimer: Our molecular clone sequence data has been matched to the sequence identifier above as a

point of reference. Note that the complete sequence of this clone is largely the same as the

reference sequence but may contain minor differences, e.g., single nucleotide

polymorphisms (SNPs).

Components: The cDNA clone is shipped in a 2-D bar-coded Matrix tube as 10 ug dried plasmid DNA. The

package also includes 100 pmols of both the corresponding 5' and 3' vector primers in

separate vials.

RHOC (NM_001042679) Human 3' UTR Clone - SC205820

RefSeq: <u>NM 001042679.2</u>

Summary: This gene encodes a member of the Rho family of small GTPases, which cycle between

inactive GDP-bound and active GTP-bound states and function as molecular switches in signal transduction cascades. Rho proteins promote reorganization of the actin cytoskeleton and regulate cell shape, attachment, and motility. The protein encoded by this gene is prenylated at its C-terminus, and localizes to the cytoplasm and plasma membrane. It is thought to be important in cell locomotion. Overexpression of this gene is associated with tumor cell proliferation and metastasis. Multiple alternatively spliced variants, encoding the same

protein, have been identified. [provided by RefSeq, Jul 2008]

Locus ID: 389 **MW:** 15.9
