

Product datasheet for **SC205833**

FKBP38 (FKBP8) (NM_012181) Human 3' UTR Clone

Product data:

Product Type:	3' UTR Clones
Product Name:	FKBP38 (FKBP8) (NM_012181) Human 3' UTR Clone
Symbol:	FKBP38
Synonyms:	FKBP38; FKBP38
Mammalian Cell Selection:	Neomycin
Vector:	pMirTarget (PS100062)
ACCN:	NM_012181
Insert Size:	436 bp
Insert Sequence:	>SC205833 3'UTR clone of NM_012181 The sequence shown below is from the reference sequence of NM_012181. The complete sequence of this clone may contain minor differences, such as SNPs. Blue =Stop Codon Red =Cloning site

```

Restriction Sites:	Sgfl-MluI
OTI Disclaimer:	Our molecular clone sequence data has been matched to the sequence identifier above as a point of reference. Note that the complete sequence of this clone is largely the same as the reference sequence but may contain minor differences, e.g., single nucleotide polymorphisms (SNPs).
Components:	The cDNA clone is shipped in a 2-D bar-coded Matrix tube as 10 ug dried plasmid DNA. The package also includes 100 pmols of both the corresponding 5' and 3' vector primers in separate vials.

RefSeq: NM_012181.5

Summary: The protein encoded by this gene is a member of the immunophilin protein family, which play a role in immunoregulation and basic cellular processes involving protein folding and trafficking. Unlike the other members of the family, this encoded protein does not seem to have PPlase/rotamase activity. It may have a role in neurons associated with memory function. [provided by RefSeq, Jul 2008]

Locus ID: 23770

MW: 15
