

## Product datasheet for **SC205898**

### N acetyl transferase 5 (NAA20) (NM\_181527) Human 3' UTR Clone

#### Product data:

Product Type:	3' UTR Clones
Product Name:	N acetyl transferase 5 (NAA20) (NM_181527) Human 3' UTR Clone
Vector:	pMirTarget (PS100062)
Symbol:	NAA20
Synonyms:	dj1002M8.1; NAT3; NAT3P; NAT5; NAT5P
ACCN:	NM_181527
Insert Size:	488 bp
Insert Sequence:	>SC205898 3'UTR clone of NM_181527

The sequence shown below is from the reference sequence of NM\_181527. The complete sequence of this clone may contain minor differences, such as SNPs.

Restriction Sites:	Sgfl-MluI
OTI Disclaimer:	Our molecular clone sequence data has been matched to the sequence identifier above as a point of reference. Note that the complete sequence of this clone is largely the same as the reference sequence but may contain minor differences , e.g., single nucleotide polymorphisms (SNPs).
Components:	The cDNA clone is shipped in a 2-D bar-coded Matrix tube as 10 ug dried plasmid DNA. The package also includes 100 pmols of both the corresponding 5' and 3' vector primers in separate vials.
RefSeq:	<u><a href="#">NM_181527.3</a></u>

**Summary:** NAT5 is a component of N-acetyltransferase complex B (NatB). Human NatB performs cotranslational N(alpha)-terminal acetylation of methionine residues when they are followed by asparagine (Starheim et al., 2008 [PubMed 18570629]).[supplied by OMIM, Apr 2009]

**Locus ID:** 51126

**MW:** 19.1
