

Product datasheet for **SC205986**

KAT5 (NM_182710) Human 3' UTR Clone

Product data:

Product Type: 3' UTR Clones
Product Name: KAT5 (NM_182710) Human 3' UTR Clone
Vector: pMirTarget (PS100062)
Symbol: KAT5
Synonyms: cPLA2; ESA1; HTATIP; HTATIP1; NEDFASB; PLIP; TIP; TIP60; ZC2HC5
ACCN: NM_182710
Insert Size: 453 bp
Insert Sequence: >SC205986 3'UTR clone of NM_182710
The sequence shown below is from the reference sequence of NM_182710. The complete sequence of this clone may contain minor differences, such as SNPs.

Restriction Sites: SgfI-MluI

OTI Disclaimer: Our molecular clone sequence data has been matched to the sequence identifier above as a point of reference. Note that the complete sequence of this clone is largely the same as the reference sequence but may contain minor differences, e.g., single nucleotide polymorphisms (SNPs).

Components: The cDNA clone is shipped in a 2-D bar-coded Matrix tube as 10 ug dried plasmid DNA. The package also includes 100 pmols of both the corresponding 5' and 3' vector primers in separate vials.

RefSeq: [NM_182710.3](#)

Summary: The protein encoded by this gene belongs to the MYST family of histone acetyl transferases (HATs) and was originally isolated as an HIV-1 TAT-interactive protein. HATs play important roles in regulating chromatin remodeling, transcription and other nuclear processes by acetylating histone and nonhistone proteins. This protein is a histone acetylase that has a role in DNA repair and apoptosis and is thought to play an important role in signal transduction. Alternative splicing of this gene results in multiple transcript variants. [provided by RefSeq, Jul 2008]

Locus ID: 10524

MW: 15.9
