

Product datasheet for SC206089

PPP2R3B (NM 013239) Human 3' UTR Clone

Product data:

Product Type: 3' UTR Clones

Product Name: PPP2R3B (NM_013239) Human 3' UTR Clone

Vector: pMirTarget (PS100062)

Symbol: PPP2R3B

Synonyms: NYREN8; PPP2R3L; PPP2R3LY; PR48; PR70

ACCN: NM_013239

Insert Size: 464 bp

Insert Sequence: >SC206089 3'UTR clone of NM_013239

The sequence shown below is from the reference sequence of NM_013239. The complete

sequence of this clone may contain minor differences, such as SNPs.

OTI Disclaimer: Our molecular clone sequence data has been matched to the sequence identifier above as a

point of reference. Note that the complete sequence of this clone is largely the same as the

reference sequence but may contain minor differences, e.g., single nucleotide

polymorphisms (SNPs).

Components: The cDNA clone is shipped in a 2-D bar-coded Matrix tube as 10 ug dried plasmid DNA. The

package also includes 100 pmols of both the corresponding 5' and 3' vector primers in

separate vials.

ORÏGENE

Summary: Protein phosphatase 2 (formerly named type 2A) is one of the four major Ser/Thr

phosphatases and is implicated in the negative control of cell growth and division. Protein phosphatase 2 holoenzymes are heterotrimeric proteins composed of a structural subunit A, a catalytic subunit C, and a regulatory subunit B. The regulatory subunit is encoded by a diverse set of genes that have been grouped into the B/PR55, B'/PR61, and B"/PR72 families. These different regulatory subunits confer distinct enzymatic specificities and intracellular localizations to the holozenzyme. The product of this gene belongs to the B" family. The B" family has been further divided into subfamilies. The product of this gene belongs to the beta subfamily of regulatory subunit B". [provided by RefSeq, Apr 2010]
