

Product datasheet for SC206251

VDAC3 (NM 001135694) Human 3' UTR Clone

Product data:

Product Type: 3' UTR Clones

Product Name: VDAC3 (NM_001135694) Human 3' UTR Clone

Symbol: VDAC3

Synonyms: HD-VDAC3; VDAC-3

Mammalian Cell

Selection:

Neomycin

Vector: pMirTarget (PS100062)

ACCN: NM_001135694

Insert Size: 522 bp

Insert Sequence: >SC206251 3'UTR clone of NM_001135694

The sequence shown below is from the reference sequence of NM_001135694. The complete

sequence of this clone may contain minor differences, such as SNPs.

Restriction Sites: Sgfl-Mlul

OTI Disclaimer: Our molecular clone sequence data has been matched to the sequence identifier above as a

point of reference. Note that the complete sequence of this clone is largely the same as the

reference sequence but may contain minor differences, e.g., single nucleotide

polymorphisms (SNPs).

VDAC3 (NM_001135694) Human 3' UTR Clone - SC206251

Components: The cDNA clone is shipped in a 2-D bar-coded Matrix tube as 10 ug dried plasmid DNA. The

package also includes 100 pmols of both the corresponding 5' and 3' vector primers in

separate vials.

RefSeq: NM 001135694.2

Summary: This gene encodes a voltage-dependent anion channel (VDAC), and belongs to the

mitochondrial porin family. VDACs are small, integral membrane proteins that traverse the outer mitochondrial membrane and conduct ATP and other small metabolites. They are known to bind several kinases of intermediary metabolism, thought to be involved in

translocation of adenine nucleotides, and are hypothesized to form part of the mitochondrial permeability transition pore, which results in the release of cytochrome c at the onset of apoptotic cell death. Alternatively transcript variants encoding different isoforms have been

described for this gene. [provided by RefSeq, Oct 2011]
