

Product datasheet for **SC206504**

CLCA4 (NM_012128) Human 3' UTR Clone

Product data:

Product Type:	3' UTR Clones
Product Name:	CLCA4 (NM_012128) Human 3' UTR Clone
Vector:	pMirTarget (PS100062)
Symbol:	CLCA4
Synonyms:	CaCC; CaCC2
ACCN:	NM_012128
Insert Size:	439 bp
Insert Sequence:	>SC206504 3'UTR clone of NM_012128 The sequence shown below is from the reference sequence of NM_012128. The complete sequence of this clone may contain minor differences, such as SNPs. Blue =Stop Codon Red =Cloning site

Restriction Sites:	Sgfl-MluI
OTI Disclaimer:	Our molecular clone sequence data has been matched to the sequence identifier above as a point of reference. Note that the complete sequence of this clone is largely the same as the reference sequence but may contain minor differences , e.g., single nucleotide polymorphisms (SNPs).
Components:	The cDNA clone is shipped in a 2-D bar-coded Matrix tube as 10 ug dried plasmid DNA. The package also includes 100 pmols of both the corresponding 5' and 3' vector primers in separate vials.
RefSeq:	NM_012128.4

Summary: The protein encoded by this gene belongs to the calcium sensitive chloride conductance protein family. To date, all members of this gene family map to the same site on chromosome 1p31-p22 and share high degrees of homology in size, sequence and predicted structure, but differ significantly in their tissue distributions. Alternative splicing results in multiple transcript variants, only one of which is thought to be protein coding. [provided by RefSeq, Dec 2008]

Locus ID: 22802

MW: 17.3
