

Product datasheet for **SC206826**

FCRLB (NM_001002901) Human 3' UTR Clone

Product data:

Product Type: 3' UTR Clones
Product Name: FCRLB (NM_001002901) Human 3' UTR Clone
Vector: pMirTarget (PS100062)
Symbol: FCRLB
Synonyms: FCRL2; FCRLM2; FCRLY; FcRY; FREB-2; FREB2
ACCN: NM_001002901
Insert Size: 511 bp
Insert Sequence: >SC206826 3'UTR clone of NM_001002901
The sequence shown below is from the reference sequence of NM_001002901. The complete sequence of this clone may contain minor differences, such as SNPs.
Blue=Stop Codon **Red**=Cloning site

Restriction Sites: Sgfl-Mlul

OTI Disclaimer: Our molecular clone sequence data has been matched to the sequence identifier above as a point of reference. Note that the complete sequence of this clone is largely the same as the reference sequence but may contain minor differences, e.g., single nucleotide polymorphisms (SNPs).

Components: The cDNA clone is shipped in a 2-D bar-coded Matrix tube as 10 ug dried plasmid DNA. The package also includes 100 pmols of both the corresponding 5' and 3' vector primers in separate vials.

RefSeq: [NM_001002901.4](#)

[View online »](#)

Summary: FCRL2 belongs to the Fc receptor family. Fc receptors are involved in phagocytosis, antibody-dependent cell cytotoxicity, immediate hypersensitivity, and transcytosis of immunoglobulins via their ability to bind immunoglobulin (Ig) constant regions (Chikhaev et al., 2005 [PubMed 15676285]).[supplied by OMIM, Mar 2008]

Locus ID: 127943

MW: 19
