Fibulin 2 (FBLN2) (NM 001998) Human 3' UTR Clone

Product data:

Product Type: 3' UTR Clones

Product Name: Fibulin 2 (FBLN2) (NM_001998) Human 3' UTR Clone

Symbol: Fibulin 2 **Mammalian Cell**

Selection:

Neomycin

Vector: pMirTarget (PS100062)

ACCN: NM 001998

Insert Size: 515 bp

>SC206919 3'UTR clone of NM_001998 **Insert Sequence:**

The sequence shown below is from the reference sequence of NM_001998. The complete

sequence of this clone may contain minor differences, such as SNPs.

OTI Disclaimer: Our molecular clone sequence data has been matched to the sequence identifier above as a

point of reference. Note that the complete sequence of this clone is largely the same as the

reference sequence but may contain minor differences, e.g., single nucleotide

polymorphisms (SNPs).

Components: The cDNA clone is shipped in a 2-D bar-coded Matrix tube as 10 ug dried plasmid DNA. The

package also includes 100 pmols of both the corresponding 5' and 3' vector primers in

separate vials.

Fibulin 2 (FBLN2) (NM_001998) Human 3' UTR Clone - SC206919

RefSeq: <u>NM 001998.3</u>

Summary: This gene encodes an extracellular matrix protein, which belongs to the fibulin family. This

protein binds various extracellular ligands and calcium. It may play a role during organ development, in particular, during the differentiation of heart, skeletal and neuronal structures. Alternatively spliced transcript variants encoding different isoforms have been

identified. [provided by RefSeq, Jul 2008]

Locus ID: 2199 **MW:** 19.9
