

Product datasheet for SC207106

CAPNS1 (NM 001003962) Human 3' UTR Clone

Product data:

Product Type: 3' UTR Clones

Product Name: CAPNS1 (NM_001003962) Human 3' UTR Clone

Vector: pMirTarget (PS100062)

Symbol: CAPNS1

Synonyms: CALPAIN4; CANP; CANPS; CAPN4; CDPS; CSS1

ACCN: NM_001003962

Insert Size: 544 bp

Insert Sequence: >SC207106 3'UTR clone of NM_001003962

The sequence shown below is from the reference sequence of $NM_001003962$. The complete

sequence of this clone may contain minor differences, such as SNPs.

Restriction Sites: Sgfl-Mlul

OTI Disclaimer: Our molecular clone sequence data has been matched to the sequence identifier above as a

point of reference. Note that the complete sequence of this clone is largely the same as the

reference sequence but may contain minor differences, e.g., single nucleotide

polymorphisms (SNPs).

Components: The cDNA clone is shipped in a 2-D bar-coded Matrix tube as 10 ug dried plasmid DNA. The

package also includes 100 pmols of both the corresponding 5' and 3' vector primers in

separate vials.

CAPNS1 (NM_001003962) Human 3' UTR Clone - SC207106

Summary:

This gene is a member of the calpain small subunit family. Calpains are calcium-dependent cysteine proteinases that are widely distributed in mammalian cells. Calpains operate as heterodimers, comprising a specific large catalytic subunit (calpain 1 subunit in Calpain I, and calpain 2 subunit in Calpain II), and a common small regulatory subunit encoded by this gene. This encoded protein is essential for the stability and function of both calpain heterodimers, whose proteolytic activities influence various cellular functions including apoptosis, proliferation, migration, adhesion, and autophagy. Calpains have been implicated in neurodegenerative processes, such as myotonic dystrophy. A pseudogene of this gene has been defined on chromosome 1. Alternative splicing results in multiple transcript variants. [provided by RefSeq, Oct 2014]
