

Product datasheet for **SC207248**

GPR183 (NM_004951) Human 3' UTR Clone

Product data:

Product Type: 3' UTR Clones
Product Name: GPR183 (NM_004951) Human 3' UTR Clone
Vector: pMirTarget (PS100062)
Symbol: GPR183
Synonyms: EBI2; hEBI2
ACCN: NM_004951
Insert Size: 551 bp
Insert Sequence: >SC207248 3'UTR clone of NM_004951
The sequence shown below is from the reference sequence of NM_004951. The complete sequence of this clone may contain minor differences, such as SNPs.
Blue=Stop Codon **Red**=Cloning site

Restriction Sites: SgfI-MluI

OTI Disclaimer: Our molecular clone sequence data has been matched to the sequence identifier above as a point of reference. Note that the complete sequence of this clone is largely the same as the reference sequence but may contain minor differences, e.g., single nucleotide polymorphisms (SNPs).

Components: The cDNA clone is shipped in a 2-D bar-coded Matrix tube as 10 ug dried plasmid DNA. The package also includes 100 pmols of both the corresponding 5' and 3' vector primers in separate vials.

RefSeq: [NM_004951.5](#)

[View online >](#)

Summary: This gene was identified by the up-regulation of its expression upon Epstein-Barr virus infection of primary B lymphocytes. This gene is predicted to encode a G protein-coupled receptor that is most closely related to the thrombin receptor. Expression of this gene was detected in B-lymphocyte cell lines and lymphoid tissues but not in T-lymphocyte cell lines or peripheral blood T lymphocytes. The function of this gene is unknown. [provided by RefSeq, Jul 2008]

Locus ID: 1880

MW: 21.6
