## MKLP1 (KIF23) (NM\_138555) Human 3' UTR Clone - SC208339

**Components:** The cDNA clone is shipped in a 2-D bar-coded Matrix tube as 10 ug dried plasmid DNA. The

package also includes 100 pmols of both the corresponding 5' and 3' vector primers in

separate vials.

**RefSeq:** <u>NM 138555.1</u>

Summary: The protein encoded by this gene is a member of kinesin-like protein family. This family

includes microtubule-dependent molecular motors that transport organelles within cells and

move chromosomes during cell division. This protein has been shown to cross-bridge

antiparallel microtubules and drive microtubule movement in vitro. Alternate splicing of this

gene results in multiple transcript variants. [provided by RefSeq, Jul 2013]
