| OTI Disclaimer:    | Our molecular clone sequence data has been matched to the sequence identifier above as a point of reference. Note that the complete sequence of this clone is largely the same as the reference sequence but may contain minor differences , e.g., single nucleotide polymorphisms (SNPs). |

| <b>Components:</b> | The cDNA clone is shipped in a 2-D bar-coded Matrix tube as 10 ug dried plasmid DNA. The package also includes 100 pmols of both the corresponding 5' and 3' vector primers in separate vials.                                             |
| <b>RefSeq:</b>     | <a href="#">NM_001348.3</a>                                                                                                                                                                                                                |
| <b>Summary:</b>    | Death-associated protein kinase 3 (DAPK3) induces morphological changes in apoptosis when overexpressed in mammalian cells. These results suggest that DAPK3 may play a role in the induction of apoptosis. [provided by RefSeq, Jul 2008] |
| <b>Locus ID:</b>   | 1613                                                                                                                                                                                                                                       |
| <b>MW:</b>         | 22.9                                                                                                                                                                                                                                       |
