Product datasheet for SC208570

SERTAD3 (NM_203344) Human 3' UTR Clone

Product data:

Product Type:	3' UTR Clones
Product Name:	SERTAD3 (NM_203344) Human 3' UTR Clone
Symbol:	SERTAD3
Synonyms:	RBT1
Mammalian Cell Selection:	Neomycin
Vector:	pMirTarget (PS100062)
ACCN:	NM_203344
Insert Size:	676 bp
Insert Sequence:	>SC208570 3'UTR clone of NM_203344 The sequence shown below is from the reference sequence of NM_203344. The complete sequence of this clone may contain minor differences, such as SNPs. Restriction Sites:	SgfI-MluI
OTI Disclaimer:	Our molecular clone sequence data has been matched to the sequence identifier above as a point of reference. Note that the complete sequence of this clone is largely the same as the reference sequence but may contain minor differences , e.g., single nucleotide polymorphisms (SNPs).

Components:	The cDNA clone is shipped in a 2-D bar-coded Matrix tube as 10 ug dried plasmid DNA. The package also includes 100 pmols of both the corresponding 5' and 3' vector primers in separate vials.
RefSeq:	NM_203344.3
Summary:	The protein encoded by this gene was identified in a yeast two-hybrid assay employing the second subunit of human replication protein A as bait. It is localized to the nucleus and its expression is significantly higher in cancer cell lines compared to normal cell lines. This protein has also been shown to be a strong transcriptional co-activator. Alternative splicing has been observed at this locus and two variants, both encoding the same protein, have been identified. [provided by RefSeq, Jul 2008]
Locus ID:	29946
MW:	24.4
