

Product datasheet for SC209036

PKIG (NM_181805) Human 3' UTR Clone

Product data:

Product Type: 3' UTR Clones
Product Name: PKIG (NM_181805) Human 3' UTR Clone
Symbol: PKIG
Synonyms: PKI-gamma
Mammalian Cell Selection: Neomycin
Vector: pMirTarget (PS100062)
ACCN: NM_181805
Insert Size: 703 bp

Insert Sequence: >SC209036 3'UTR clone of NM_181805
The sequence shown below is from the reference sequence of NM_181805. The complete sequence of this clone may contain minor differences, such as SNPs.

Components:	The cDNA clone is shipped in a 2-D bar-coded Matrix tube as 10 ug dried plasmid DNA. The package also includes 100 pmols of both the corresponding 5' and 3' vector primers in separate vials.
RefSeq:	<u>NM_181805.3</u>
Summary:	This gene encodes a member of the protein kinase inhibitor family. Studies of a similar protein in mice suggest that this protein acts as a potent competitive cAMP-dependent protein kinase inhibitor, and is a predominant form of inhibitor in various tissues. The encoded protein may be involved in osteogenesis. Alternative splicing results in multiple transcript variants. [provided by RefSeq, Jul 2013]
Locus ID:	11142
MW:	25.8
